

MENU Solution Update

August 2022

A PAR Technology Company

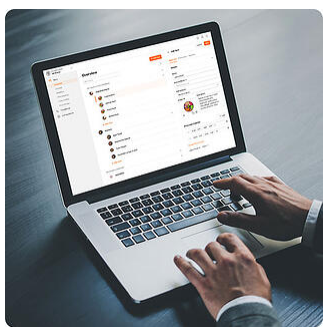

Insights

We're teaming up with PAR!

The goal is to accelerate our joint vision of an all-in-one restaurant technology platform, advance our product development efforts and provide an even better service to our customers worldwide.

Forbes Business Council: Enterprise Restaurant Brands Should Adopt Unified Commerce

Restaurant operations are becoming more complex and expensive. Unified Commerce helps solve these burning issues by allowing restaurants to cut down their list of vendors and improve overall technology performance.

Product corner

Launched

Order Cancellation Reasons

Your customers' ability to cancel orders, paired with your staff's ability to provide reasons for in-house cancellations, equals comprehensive reporting data on cancellations that will help you better manage your business.

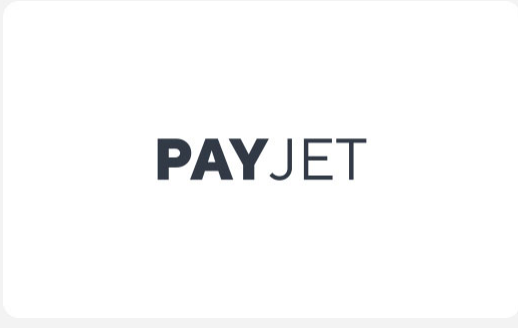

Order ready screen

We aim for simplicity - use the POS provided check number as the order identifier with our Kiosk, Web and Mobile apps. The same order identifier is used in the restaurant's POS Order Number Display for order collection.

New Marketing Website components

We've added two more components to the Marketing Website. Add an external Custom Script exactly where you want to, or customize your Top Banner to draw your customers' attention to what you want them to focus on.

New integration

PayJet
(Kiosk: Payment - Europe)

Coming soon

Brand Menu Management

Manage your menu centrally across multiple POS systems and independent POS databases.

Web Cookie Policy

Give users flexibility over which types of cookies they would like to accept when they first open your Web app.
