Product corner

Launched

Guest Checkout Optimization

Give your Clients flexibility and ease when they pay online with this optimized feature. And since their data stays saved - you can increase the number of orders by making it easier to re-order next time!

Force Mobile App Update

Let your Customers get the most from your Brand - force update of their Mobile Apps, so that everything is fully compatible with MENU Ecosystem!

Mobile App : Menu Single Page Store Layout

Life isn't one-dimensional. Nor is food. And neither is your business. Give your Customers a fast, clear and seamless ordering experience with a Single Page Store Layout! They will see more, but it will be easier for them to navigate.

Marketing Website: Under Construction

Make change to your online content without disrupting the experience of your Customers - just put your Marketing Website in Under Construction state and carry on.
New integrations

Computop
(Kiosk: Payment - Global)

Deliveroo
(Delivery - Western Europe, UAE, Kuwait, and Australia)

Doordash
(DSP - USA, Canada, Japan, Australia)

PedidosYa
(DSP - LATAM)

Coming soon

Activity logs

The Activity Logs feature tracks changes made by users in the Management Center to easily understand which changes were made, who made them and when they were made.

Order ready screen

Use your existing POS-provided Order Ready Screen to notify Mobile or Web customers when their order is ready.

Loyalty points for cash orders

Award your customers with loyalty points when they use cash to pay for their orders.

Foodspot subsidies

Foodspot orders can now have a company subsidy applied in addition to a restaurant discount. Enable your business customers to subsidize their employee's Foodspot orders.
