

MENU Solution Update

Q4 2023

Hello,

Discover our latest game-changing features and integrations, tailored to enhance your restaurant's success. Stay at the forefront of the restaurant industry with our newest releases!

What's coming up in Q4?

Data Pipelines

Unlock the full potential of your data with our Data Pipelines feature. Seamlessly extract, transform, and load data from the menu to your preferred data lake or warehouse. This streamlined process empowers you to effortlessly integrate valuable insights into your overarching analytics and business intelligence initiatives.

Dynamic Pricing

Optimize your pricing strategy effortlessly with our dynamic pricing feature. Whether you choose to apply adjustments based on a percentage or a fixed amount, you'll gain the power to inflate prices in bulk. This not only enhances operational efficiency and speed but also cultivates healthier profit margins for your business.
